

STEAMER SINKS OFF MARYLAND K. OF C. DUNS NEW BUILDINGS

Saetia, Returning From France, Apparently Struck a Mine.

Washington, D. C., Nov. 11.—Eighty-one men, who were aboard the American steamer Saetia, which sank Saturday morning off Ocean City, Md., after an explosion, have been safely landed. In making this announcement last night the navy department said it accounted for "approximately all" of those aboard.

Believed Mine Struck.
Twenty minutes after striking what is believed to have been a mine, the American steamer Saetia, a 1000-ton transport, sank 25 miles off shore here at 3:35 p. m. Saturday.

The sinking of the ship was preceded by an explosion a few minutes after 3 o'clock. A few minutes later two more violent explosions followed. Although the ship was built to withstand a mine, she was not built to withstand a mine striking her bow.

The Saetia left its convoy returning from France three days before the disaster and was bound for Baltimore. Just 35 miles off this place she ran into the mine. Before the ship could offload the first explosion threw half the crew into the sea.

Capt. Lynch immediately ordered "all hands on deck," but before lifeboats could be lowered the second explosion poured in on the bow and caused additional casualties. A few minutes later the ship settled in about 200 feet of water.

FLU SPREADING OVER THE WORLD

Germ Kludes Bacteriologists and Health Authorities Are Baffled.

The influenza epidemic continues unabated. Its ravages are not confined to this city or state or even to the United States, and cable reports indicate that it is rapidly spreading over the civilized world. It has baffled medical skill to an unusual extent and has claimed more victims than any other epidemic in a score of years. The germ has eluded the bacteriologists and physicians now agree that the best cure is prevention.

The surest prevention is to build up the bodily powers of resistance and to get the system in the best physical condition possible. It is now universally agreed that it is possible to perfect the powers of resistance of the human system so that it can throw off almost any infection not excepting Spanish influenza.

It has been discovered that persons who are weak and run down are the easiest victims, and if you find yourself tired or weak and losing flesh, or if you are in a generally rundown condition and below your normal weight, this warning should be heeded promptly.

If you are in this condition nothing can build you up so fast as the strengthener you like Tanlac, which contains the most powerful tonic properties known to science. As a reconstructive tonic and system builder it is without an equal and contains the very elements needed by the system to give you fighting strength to ward off the influenza germ. This is a statement of facts and is supported by the recognized authorities and references works, including the United States Dispensary and the Encyclopedia Britannica and leading textbooks used in the schools of medicine. This statement is further proven by the fact that millions of persons who have actually taken Tanlac have testified to its extraordinary merit as a medicine, and by the fact that Tanlac is today having the greatest sale of any tonic on the American market, over eleven million bottles having been sold within the past three years.

Tanlac is also the ideal strengthening tonic for persons who are suffering from the after-effects of influenza, grippe or bronchial troubles and hundreds of thousands are using it daily with the most gratifying results.

In connection with the Tanlac treatment it is suggested that the bottles open by taking Tanlac Tablets, samples of which are included with every bottle of Tanlac. Tanlac is sold by Kelly & Pollard, Inc., and People's Drug Store.—Adv.

New Mex. Taxes In Coming Year \$20 Per Capita

Total Amount to Be Raised by Taxation Is Close To \$7,000,000.

Santa Fe, N. M., Nov. 11.—Twenty dollars per capita is the amount of taxes, not including federal levies, that New Mexico people are called upon to pay during the coming year, the total amount to be raised for state, county, municipal and school purposes being close to \$7,000,000. The bonded indebtedness of state and subdivisions totals \$30 per capita.

Since 1914, the expenditures for schools have increased 130 percent, and yet salaries of teachers are declared woefully inadequate and the rural schools are still far from what they should be, despite the manifest improvement year by year.

Not including appropriations and income from state institutions, the schools during the coming year will have an income of \$2,000,000 or \$20 per capita. For roads the coming year will have more than four times as much available as there was in 1914, a total of \$1,500,000 being provided for the next 12 months.

REDMOND FOLKS IN GOOD SHOW

Popular Comedy Company Reopens; El Paso Song Is a Big Hit.

"Cupid's Prescription," staged last evening at the Crawford by the Redmond Folks company, proved a happy vehicle for the reopening of the company and theater and met with hearty appreciation by a well filled house.

The simplicity and wholesomeness of the story, its musical score, which proved a keep dollar and it is doubtful if more pleasing entertainment has ever been offered the patrons of the Crawford.

The premise is laid about the efforts of a young Broadwayite to win the love of a girl who is a native of the village where he was born, but here the emphasis is to a commonplace story ends, the dramatist having deftly interpreted the story in a cleverly drawn comedy situation, a heart interest theme of pulsating melody.

The building at Mesilla Park is to be centrally located for the convenience of the soldiers when in town. They are to be conducted in cooperation with the war camp community service.

The building at Mesilla Park is to be what is termed a Knights of Columbus "club" building, 75 by 25 feet. Two big porches are to feature it. The plans and specifications have been approved and work will be commenced on them within a week. The committee in charge is composed of S. T. Winters, chairman; C. J. Haggerty, secretary; J. J. O'Brien and J. C. Sauer, members.

Mr. Fox said that he would stop off at Del Rio and Port Clark, Tex., to see if it was advisable to consider Knights of Columbus halls there.

Says French Boys Now Shoot "Craps" Just Like Yankees
The French in their gratitude to the American allies are taking quickly to many of our customs and habits and some of our games. Even the little French boys have learned to shoot "craps" with all the enthusiasm of a child.

David D. Burke from France to his wife, who is cashier in the Potter Hotel & Confectionery Co. "Only the other day another officer and I waited for an hour a half of little French boys, first little fellows, playing the game. They had absorbed all the motions, gestures, earnestness and gusto, and if they had been black you would have sworn they were little negro boys just rolling out French instead of English with the dice. It was sure funny to listen to their 'seven come eleven' and other phrases. I don't think they learned so much about the game from our negro soldiers only."

QUARANTINE ON PUBLIC SCHOOLS IN N. M. LIFTED
Santa Fe, N. M., Nov. 11.—Gov. V. E. Lohmeyer today lifted the quarantine on public schools as a result of a public instruction J. H. Wagner, that the quarantine on public schools has been removed as far as the state executive is concerned.

This Famous Actress Will Appear at Unique Tomorrow In Her Latest Play.

Ethel Barrymore, the beautiful actress of international fame, will be the star of "Our Mrs. McChesney" at the Unique, starting tomorrow. This is the story of a clever woman who retrieves the fallen fortunes of a business firm, for whom she is a traveling saleswoman, by unique and original methods of her own. The head of the firm, a young and attractive man, falls in love with her but she will not listen to his pleadings until she has placed the business on a firmer and more prosperous footing than it ever has been before—despite a rival concern's opposition.

One of the most striking and up-to-date features of the play is the fact that it has been seen as one of the original features in "Our Mrs. McChesney". The costumes for this scene come from the atelier of the great French modiste who enters to the most fastidious women of the country and are noted for their distinctiveness and individuality.—Adv.

WIGWAM—CARUSO, THE GREAT.
Under the direction of Edward Jose, Enrico Caruso and the like, W. J. Wigwam, the great tenor of the Metropolitan opera house, will be the star of the new production of "The Wigwam" at the Unique, starting tomorrow. The production is a number of interior scenes, about 300 actors were used in the making of scenes with the world famous "diamond horseshoe" and balconies as background.

The remainder of the acts for his series of scenes were made at the Metropolitan opera house, the fact that the stage of the Metropolitan was utilized for other purposes, the painting of scenery for next year's production. The members of the Metropolitan chorus took part in the scene from "The Wigwam" which was shown at the stage of the Manhattan. The support provided for Mr. Caruso is exceptional. The production is a number of interior scenes, about 300 actors were used in the making of scenes with the world famous "diamond horseshoe" and balconies as background.

Greatest Success In Motion Picture History At Grecian Today.

"The Birth of a Nation," D. W. Griffith's phenomenal picture, holds all records for attendance, length of runs and receipts. Besides, it is the only picture that has ever earned a net profit of over \$1,000,000 for its owners, and it is still going big throughout the world.

"The Birth of a Nation" was last seen in El Paso about three years ago, when it was presented at the Texas Grand at prices ranging to \$2.

The Grecian has arranged to show this picture for the first time at popular prices. Adults will pay 25 cents; children, 15 cents.

Many who did not have the opportunity of seeing it before can now see it at prices within the reach of all. And no doubt many who did see it will want to see it again, as it surely is a picture that bears repeating.

The picture will be shown at the Grecian today and all this week.—Adv.

Big Task Ahead For the Military of U. S. In Europe.

(Continued from page 1.)
The men who were sent by it to the army, in the position found vacant.

Special Legislation.
While full authority is held by the war department for the demobilization of the armed forces, the return of the nation's mobilized industries to a peace basis, it is thought, will necessitate important legislation by congress to prevent a period of acute disruption of business. Officials here expect that congress will be called upon soon to consider a "demobilization bill" which will deal with this and kindred problems.

Demobilization of units of the army to remain in France over the period of settlement has not been taken by the war department. It should be realized, officials point out, that even after terms of peace have been signed, a work of stupendous magnitude will remain. Millions of tons of material, comprising railroads, equipment as well as arsenal supplies, repair and refitting plants and the strictly military equipment must be collected and involved preparatory to their disposal, either to one of the belligerent governments or reshipment to the United States. An army of considerable size will be needed for this work for months after the war ends.

It has been suggested that the units to remain in France for this work be obtained by calling for volunteers from the expeditionary forces. Under existing law, authority is given for the maintenance of a regular army up to a strength of 400,000 men. Military men believe, however, that a much larger force will be required in Europe for possibly two years after the signing of peace.
